

QUESTION SHARER

Do you know that you can have access to **all** your Moodle questions?

In the following lines, we will explain about questions behavior, course category, and the role of **Question Sharer**.

Whenever you create a Moodle question by default it goes to the question bank in a category that belongs to that course. Teachers can create questions and they get stored linked to the course.

So, if you make a quiz for Biology001 course, your questions will automatically be added to “Default for Biology001”.

Biology001

Also show old questions

Teachers can have access to different categories per their permissions. For example, you might have access to **question categories** in your own Biology001 course whereas your colleague teaching Physics001 with permissions to Physics **course category** has access to questions from Physics001 and Physics002.

Assign roles in Category: Physics

Please choose a role to assign

Physics001 teacher had his course placed in Physics course category and had a new role of **Question Sharer** assigned to him by the Moodle Administrator

Role	Description	Users with role
Manager		0
Course creator		0
Question Sharer	Users are allowed to share questions at category or site level (system, block, user)	1 Physics001 Teacher

The **Question Sharer** role needs to be set up by your instance Moodle Administrator. This role could be for system, course category, block, activity, and user.

If you wish to access, save, edit any questions in a course category, Moodle Administrator will assign you a role of **Question sharer** with the scope of a specific **course category** such as Physics and **shared question category** such as Default for Physics.
